

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Withdrawn) A screening method for a prophylactic or therapeutic substance for a disease associated with a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence shown by SEQ ID NO:2 or a salt thereof, which comprises

using said protein or a partial peptide thereof or a salt thereof.

2. (Withdrawn) A screening method for a prophylactic or therapeutic substance for a disease associated with a protein comprising the amino acid sequence shown by SEQ ID NO:2 or a salt thereof, which comprises

using said protein or a partial peptide thereof or a salt thereof.

3. (Withdrawn) The screening method of claim 1, wherein the disease is a renal disease.

4. (Withdrawn) The screening method of claim 1, wherein the disease is diabetic nephropathy.

5. (Withdrawn) The screening method of claim 1, which comprises cultivating a cell having an ability to produce a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence shown by SEQ ID NO:2 or a partial peptide thereof in the presence and absence of a test substance, and

comparing the amounts of said protein or a partial peptide thereof produced under the two conditions.

6. (Withdrawn) A screening kit for a prophylactic or therapeutic substance for a disease associated with a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence shown by SEQ ID NO:2 or a salt thereof, which includes (a) a cell having an ability to produce said protein or a partial peptide thereof, and (b) a substance selected from the group consisting of an antibody against said protein or a partial peptide thereof or a salt thereof, a polynucleotide to which said protein or a partial peptide thereof or a salt thereof can bind, and a transcription regulatory factor capable of interacting with said protein or a partial peptide thereof or a salt thereof.

7. (Withdrawn) The screening method of claim 1, which comprises comparing the activities of a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence shown by SEQ ID NO:2 or a partial peptide thereof or a salt thereof in the presence and absence of a test substance.

8. (Withdrawn) A screening kit for a prophylactic or therapeutic substance for a disease associated with a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence shown by SEQ ID NO:2 or a salt thereof, which includes (a) said protein or a partial peptide thereof or a salt thereof, and (b) a polynucleotide to which said protein or a partial peptide thereof or a salt thereof can bind or a transcription regulatory factor capable of interacting with said protein or a partial peptide thereof or a salt thereof.

9. (Currently amended) A screening method for a prophylactic or therapeutic substance for a renal disease, which comprising[es]

(a) cultivating a cell

that has ~~contains~~ an insulin gene or a gene under the control of an insulin

promoter with and

that produces a protein comprising the same or substantially the same

amino acid sequence as the amino acid sequence shown by SEQ

ID NO:2 or a partial peptide thereof ~~or a salt thereof~~

in the presence and absence of a test substance,

(b) comparing the expression level of the insulin gene or the gene under the

control of the insulin promoter in the presence and absence of the test

substance, and

(c) selecting the test substance that changes the expression level of the insulin

gene or the gene under the control of the insulin promoter as a candidate for the

prophylactic or therapeutic substance.

10. (Withdrawn) A screening kit for a prophylactic or therapeutic substance for a disease associated with a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence shown by SEQ ID NO:2 or a salt thereof, which includes (a) a cell containing a gene whose expression is controlled by said protein or a partial peptide thereof or a salt thereof, (b) said protein or a partial peptide thereof or a salt thereof, and (c) a polynucleotide capable of hybridizing to said gene under highly stringent conditions.

11. (Withdrawn) The screening method of claim 7, which comprises cultivating a cell having an ability to produce a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence shown by

SEQ ID NO:2 or a partial peptide thereof in the presence and absence of a test substance, and

comparing the activities of said protein or a partial peptide thereof under the two conditions.

12. (Withdrawn) A screening kit for a prophylactic or therapeutic substance for a disease associated with a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence shown by SEQ ID NO:2 or a salt thereof, which includes (a) a cell having an ability to produce said protein or a partial peptide thereof, and (b) a polynucleotide capable of hybridizing to a gene whose expression is controlled by said protein or a partial peptide thereof or a salt thereof under highly stringent conditions.

13-14. (Canceled)

15. (Previously presented) The screening method of claim 9, wherein the cell contains a polynucleotide comprising the nucleotide sequence shown by SEQ ID NO:1, which encodes the amino acid sequence shown by SEQ ID NO:2.

16. (Canceled)

17. (Previously presented) The screening method of claim 9, wherein the renal disease is diabetic nephropathy.

18. (Canceled)

19. (Withdrawn) A screening kit for a prophylactic or therapeutic substance for a disease associated with a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence shown by SEQ ID NO:2 or a salt thereof, which includes (a) a cell having an ability to produce said protein or a partial

peptide thereof, and (b) a polynucleotide capable of hybridizing to mRNA that encodes said protein or a partial peptide thereof under highly stringent conditions.

20. (Withdrawn) A prophylactic or therapeutic method for a disease associated with a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence shown by SEQ ID NO:2 or a salt thereof in a mammal, which comprises

administering an antibody against said protein or a partial peptide thereof or a salt thereof to said mammal.

21. (Withdrawn) The prophylactic or therapeutic method of claim 20, wherein the disease is a renal disease.

22. (Withdrawn) The prophylactic or therapeutic method of claim 20, wherein the disease is diabetic nephropathy.

23. (Withdrawn) A prophylactic or therapeutic method for a disease associated with a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence shown by SEQ ID NO:2 or a salt thereof in a mammal, which comprises

administering a polynucleotide having a base sequence complementary to the base sequence that encodes said protein or a partial peptide thereof to said mammal.

24. (Withdrawn) The prophylactic or therapeutic method of claim 23, wherein the disease is a renal disease.

25. (Withdrawn) The prophylactic or therapeutic method of claim 23, wherein the disease is diabetic nephropathy.

26. (Withdrawn) A diagnostic method for a disease associated with a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence shown by SEQ ID NO:2 or a salt thereof in a mammal, which comprises using an antibody against said protein or a partial peptide thereof or a salt thereof.

27. (Withdrawn) The diagnostic method of claim 26, wherein the disease is a renal disease.

28. (Withdrawn) The diagnostic method of claim 26, wherein the disease is diabetic nephropathy.

29. (Withdrawn) A diagnostic method for a disease associated with a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence shown by SEQ ID NO:2 or a salt thereof in a mammal, which comprises using a polynucleotide comprising the base sequence that encodes said protein or a partial peptide thereof.

30. (Withdrawn) The diagnostic method of claim 29, wherein the disease is a renal disease.

31. (Withdrawn) The diagnostic method of claim 29, wherein the disease is diabetic nephropathy.

32-33. (Canceled)

34. (Withdrawn) A prophylactic or therapeutic method for a renal disease in a mammal, which comprises administering a TSC-22 suppressant to said mammal.

35. (Withdrawn) The method of claim 34, wherein the renal disease is diabetic nephropathy.

36-37. (Canceled)

38. (Currently amended) The screening method of claim 9, wherein the ~~change in test substance that increases~~ the expression level of the insulin gene or the gene under the control of the insulin promoter is an increase in the expression level selected as a candidate for the prophylactic or therapeutic substance.

39. (Previously presented) The screening method of claim 9, wherein the cell is cultivated with a protein comprising the amino acid sequence shown by SEQ ID NO:2 or a salt thereof.

40. - 43. (Canceled)
